Education

Indian Institute of Information Technology (IIIT), Kota <i>Bachelor of Technology — Computer Science and Engineering</i> Euro International School <i>Senior Secondary Education (Class XII — Science Stream)</i>	Kota, Rajasthan, India <i>Aug 2024 – Aug 2028</i> Mahendragarh, Haryana, India <i>Graduated May 2024</i>
--	---

Technical Skills

Languages: C++, Python, Java, JavaScript, HTML5, CSS3
Web Development: Vanilla JS, GSAP (ScrollTrigger), Canvas API, <code>requestAnimationFrame</code> , <code>IntersectionObserver</code>
Machine Learning: NumPy, Pandas, Scikit-learn, Supervised & Unsupervised Learning (learning)
CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS
Tools & Platforms: Git, GitHub, GitHub Pages, VS Code, Microsoft Excel, Linux (CLI)
Competitive Programming: LeetCode, Codeforces, CodeChef

Competitive Programming

LeetCode — Ramandeep1208 Active
- Solved 350+ problems spanning Easy, Medium, and Hard — covering Arrays, Strings, Trees, Graphs, Dynamic Programming, and Binary Search. - Consistently practises contest problems to sharpen time-complexity analysis and optimal solution design.
Codeforces — Newbie (Rating 899) CodeChef — 1 (Rating 1220) Active
- Accumulated 500+ problems solved cross-platform, demonstrating consistent practice across varied problem styles and contest formats. - Regularly participates in rated rounds to improve speed, implementation accuracy, and algorithmic intuition.

Projects

Game of Thrones — Cinematic Web Experience <i>HTML, CSS, JS, GSAP</i> Live GitHub June 2025
- Built a scroll-driven cinematic landing page that scrubs a video frame-by-frame in sync with scroll position across 6 animated chapters, delivering an immersive storytelling experience. - Engineered a GSAP ScrollTrigger pipeline mapping scroll progress to <code>video.currentTime</code>, enabling smooth 60fps video scrubbing with zero native media controls. - Achieved sub-50ms chapter transitions using staggered GSAP timelines and <code>IntersectionObserver</code>-driven card entrance sequences across 6 interactive house cards.
Money Heist Fan Page <i>HTML, CSS, JavaScript</i> Live GitHub June 2025
- Built an interactive landing page featuring a real-time Canvas-based mouse-trail reveal effect that dynamically transitions between two layered images based on live cursor position. - Implemented custom Canvas API rendering with offscreen compositing, radial gradient glow effects, and a smooth <code>requestAnimationFrame</code> animation loop sustaining 60fps performance.

Certifications & Courses

AI/ML Course	Aiacademia
<i>Ongoing — Supervised & Unsupervised Learning, Model Evaluation, Python (NumPy, Pandas, Scikit-learn)</i>	<i>2025 – Present</i>
AI Basics	TCS iON
<i>Ongoing — Foundational concepts in Artificial Intelligence</i>	<i>2026 – Present</i>
Introduction to Model Context Protocol (MCP)	Anthropic
<i>Certificate of Completion — Fundamentals of MCP architecture for connecting AI models to external tools and data</i>	<i>2026</i>
Professional Soft Skills Training (7 modules)	TCS iON
<i>Business & Email Etiquette, Group Discussion, Interview Skills, Presentation Skills, Resume Writing</i>	<i>Jun 2026</i>

Achievements

Academic Distinction
Secured admission to IIIT Kota through JEE Mains 2024 — a premier NIT-tier institute for Computer Science Engineering.
Problem Solving Milestones
- Crossed 350+ problems on LeetCode and 500+ problems cross-platform within the first year of competitive programming. - Achieved rated contest rankings on both Codeforces (Rating: 899) and CodeChef (1, Rating: 1220) through consistent contest participation.
